

Pilot Operated 2-Port Solenoid Valve for Dry Air

VQ20/30 Series

Compact and lightweight with large flow capacity

	Weight (g)	C [dm ³ /(s·bar)]
VQ20	46	1.5 (C8)
VQ30	80	3.0 (C12)

High frequency operation possible

High speed response 7 ms or less (VQ20), 20 ms or less (VQ30)

(High speed response type without light/surge voltage suppressor at the supply pressure of 0.5 MPa)

Long operating life

Easy piping with One-touch Fittings

**Dusttight low jetproof enclosure (IP65)
compliant in DIN terminal type.**

Application: Air-blow, Blow-off of workpiece, etc.

Note 1) This product is for dry air. Use in clean air, and be sure that drain and oil content does not flow into the product.
Note 2) Use dry air to prevent condensation when operating at low temperatures.

Note 3) Manual override is available only for DIN terminal type.

Note 4) Vibration resistance: No malfunction occurred in a one-sweep test between 8.3 and 2000 Hz. Test was performed at both energized and de-energized states to the axis and right angle directions of the main valve and armature (value at the initial state).

Impact resistance: No malfunction resulted from the impact test using a drop impact tester. The test was performed on the axis and right angle directions of the main valve and armature for both energized and de-energized states (value at the initial state).

Note 5) DIN terminal type: Applicable to dusttight and low jetproof (IP65).

DIN rail mounting bracket

VVQZ100-DB-5

This bracket is used for mounting the manifold on the DIN rail. DIN rail mounting bracket is attached on the manifold.

1 set of DIN rail mounting brackets for 1 manifold includes 2 brackets.

Blanking plate assembly (with O-ring and 2 mounting screws)

Mount a blank plate on valve manifold when a valve is disassembled for maintenance purposes, or when spare valve unit is supposed to be mounted in the future.

Specific Product Precautions 1

Be sure to read this before handling the products.

Refer to page 810 for safety instructions and pages 811 to 813 for 2-port solenoid valve for fluid control precautions.

Selection

Warning

1. Air quality

This product is for dry air. Drain, oil, etc. in the air may result in faulty operation. Use clean (dry) air.

2. Pressure differential

If a restrictor (nozzle, etc.) is mounted on the outlet side, the outlet side pressure differential at the inlet side is smaller.

Be sure the pressure differential when ON does not drop below 0.01 MPa.

Manual Override

Warning

Manual override is used to switch the main valve without inputting an electrical signal for the valve. (DIN terminal only.)

Slotted locking type (tool required)

Push the manual override button with a small flat head screwdriver until it stops. Turn it in the counterclockwise direction at 90° to lock the manual. Turn it right to release.

Specific Product Precautions 2

Be sure to read this before handling the products.

Refer to page 810 for safety instructions and pages 811 to 813 for 2-port solenoid valve for fluid control precautions.

How to Wire DIN Terminal

Caution

ISO#: Based on DIN 43650C (Pin gap 8 mm)

Connection

1. Loosen the tightening screw and pull the connector off of the solenoid valve.
2. After removing the tightening screw, divide the terminal block and housing by prying open the slot area of the lower part of the terminal block open with a screwdriver.
3. Loosen the terminal screws of the block and insert stripped lead wires in accordance with the wiring diagram. Secure each wire by re-tightening the terminal screw (In the case of terminal 1: (+), 2: (-) DC)
4. Tighten the ground nut to secure the cable wire.

Change of electrical entry

Wire entry can be changed by mounting the housing in either direction (four directions at every 90°) after dividing the terminal block and the housing.

* For the indicator lighted type, be careful not to damage the light with the lead wire of the cable.

Precautions

Insert a connector straight or pull it out straight, using caution it does not be tilted.

Applicable cable

Cord O.D.: $\phi 3.5$ to $\phi 7$

(Reference) 0.5 mm² 2-core and 3-core wire equivalent to JIS C 3306.

How to Mount/Remove from DIN Rail

Caution

Removing procedure

1. Loosen the clamp screw on the "A" side of both ends of the manifold.
2. Lift the "A" side of the manifold off the DIN rail and slide it in the direction of the arrow.

Mounting procedure

1. Hook the mounting hook on the "B" side of the manifold base to the DIN rail.
2. Press down side "A" and mount the end plate on the DIN rail. Tighten the clamp screw on side "B" of the end plate.

(Tightening torque: 0.3 to 0.4 N·m).

Valve Mounting

Caution

After confirming the gasket is correctly placed under the valve, tighten the mounting screws with the appropriate torque (0.7 to 0.8 N·m).
